AUS McGill Website

This website is based on WordPress and its design has been done from scratch. Its numerous features, such as AUS Calendar, Locker Rental System, AUS Community (an online bulletin board for clubs and services), and more makes it a one-stop shop for Arts students for everything AUS. Lastly, the mobile site is lightweight and designed with touch in mind, with a flat interface common on most mobile platforms.

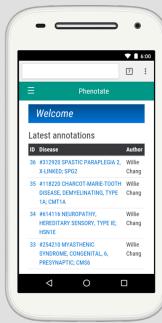

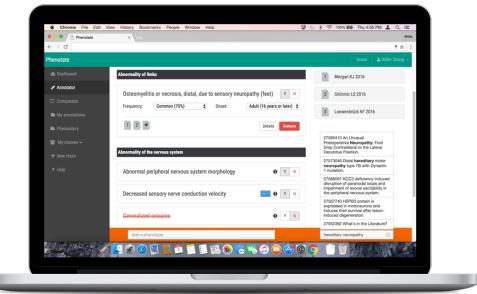

The website has since been redesigned by my successor. Please find the archived site at <http://yearbooklabs.com/aus/>

Phenotate

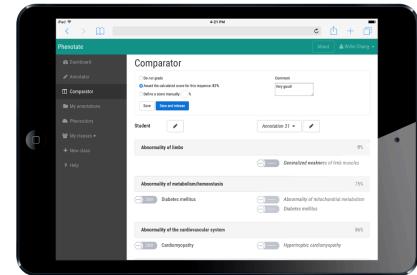

Together, we will build a curated library of accurate, machine-readable disease annotations for differential diagnosis software.

Create. Rapidly annotate diseases with phenotypes from the Human Phenotype Ontology. Specify attributes such as frequency, onset, severity, and more. Drag and drop references to cite your annotations with ease.

Publish. Publish your completed annotations to the Phenosity, a repository of disease annotations created by researchers. View, recommend, and build off of annotations created by others.

Crowdsource. Create exercises consisting of diseases for your students to annotate. Evaluate their responses using automated comparisons against published annotations. Help us build a library of annotations by letting your students work on diseases that currently do not have published annotations.

Yearbook Labs

MeteoWear

MeteoWear lets you view the current weather in your location and two other cities of your choice. Plus, get detailed hourly forecasts up to 48 hours from now and daily forecasts for the week ahead. View information on wind, precipitation, pressure, humidity, visibility, dew point, sunrise and sunset times, and moon phase.

GradForms Messenger
keeps you in touch with
students and parents.

Optimized for tablets

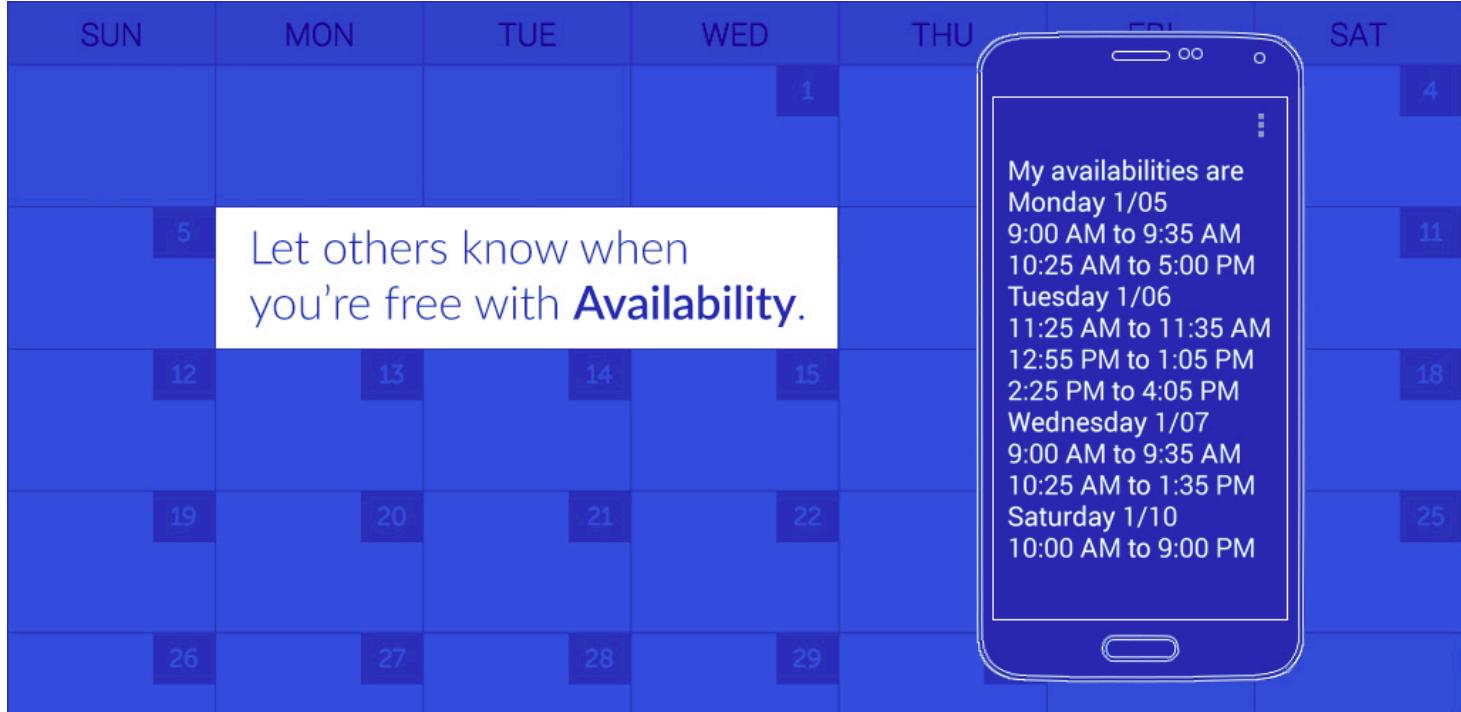

Android is a trademark of Google Inc.

GradForms Messenger is an app for Android which lets teachers communicate with students and parents via instant messaging, allowing them to free up their email inbox. Students and parents log into GradForms to check new messages.

Meat

Plan better meeting times

Choose the dates on which you would like to meet.

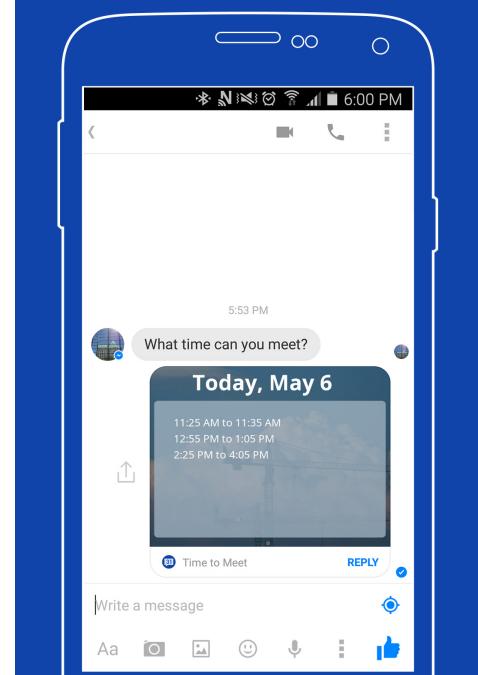

Meat is an extension of Availability, designed for people who want to plan meeting times that work for everyone. It works with your existing calendars and Facebook Messenger.

Share meeting times via Messenger with just a tap.

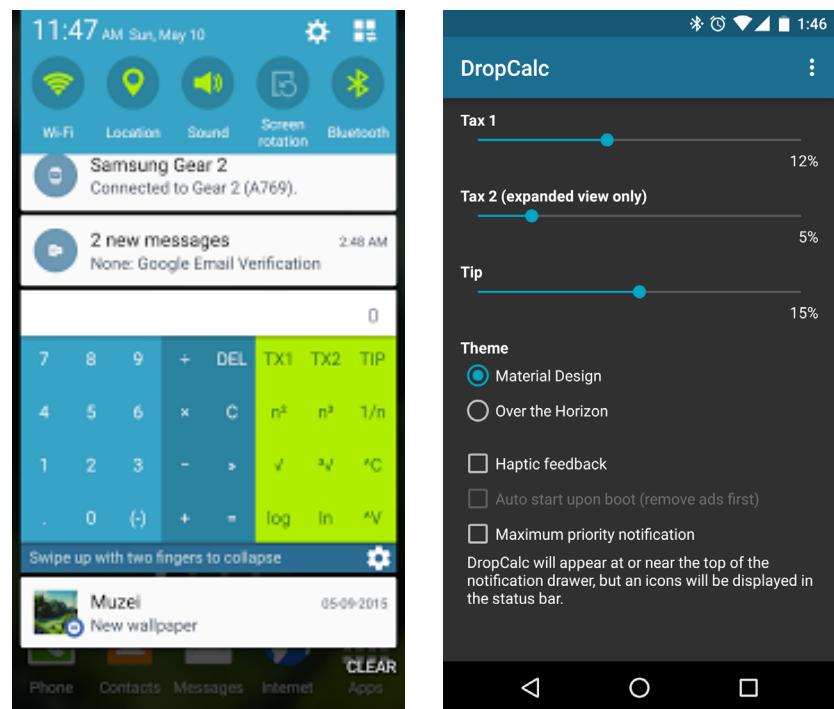

Yearbook Labs

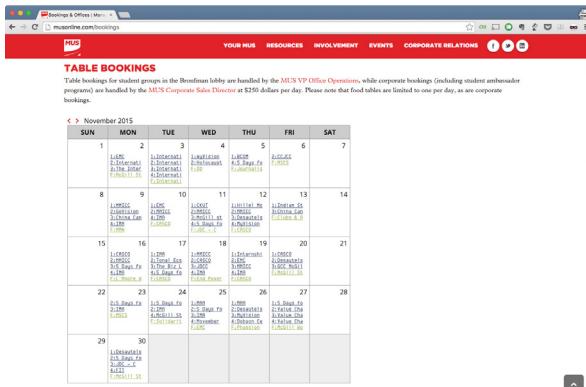

DropCalc is the first (and likely still the only, as you are reading this) calculator for the Android notification drawer. It works with Android 5.0 and above. There is a version for simple calculations and another for scientific calculations.

More projects

MUS Table Booking

Based on the AUS Table Booking System, which I also wrote from scratch, the MUS Table Booking System lets student clubs and services book a table in the Bronfman foyer in less than a minute.

<http://mus.mcgill.ca/bookings/>

A screenshot of the 'First Year Council' website for the Students' Society of McGill University (SSMU). The header features the 'FYC SSMU' logo and the text 'First Year Council of the Students' Society of McGill University'. Below the header, there's a 'Stay updated...' section with a 'Like' button and a 'Facebook' link. The main content area has a large image of a building with the 'FYC' logo overlaid. To the right, there's a 'Language/Langue' dropdown menu set to 'English', a 'We are the FYC...' text block, and a 'Learn more and meet our execs >>' button. Further down, there's a 'Have something to say?' feedback form and a 'Upcoming Meetings' section.

First Year Council

The first year of undergraduate life can be daunting. The FYC website helps fulfill the mandate of the Council in representing first year students and informing them of news and updates. This site was done in collaboration with fellow student Shant Boodaghians.

<http://ssmu.mcgill.ca/fyc/>

A screenshot of the 'Mr. Clancy' website, which is a curricular resources page. The header says 'Mr. Clancy'. The main content is organized into four columns: 'Courses' (Digital Media 9, Film and TV, Photo 11, Photo 12, Yearbook), 'Services' (Email me at MrClancy@u44.ca, Upload Center, GradsConnect, Weather), 'Manuals' (Nikon D3000, Nikon D7000, Nikon D60, Nikon D80, Canon PowerShot A590, Speedlight SB-600), and 'Links' (links to Mr. Clancy's blog, Curriculum, Resources, Portfolio, Photo 11, Photo 12, and MrClancy.ca). At the bottom, there's a 'Quick Links' section with links to DM 9, Photo 11, Photo 12, and MrClancy.ca.

Mr. Clancy.ca

Does the Metro (or Modern UI) interface by Microsoft fit well online? By designing the website, following its specifications faithfully, we can see that Metro excels as a web design language. This website hosts curricular resources by Mr. Clancy, my digital media teacher in high school.
